

*ISSI Reduces Cost and Stress for  
Health Funds Migrating to EDI Transactions*

# Claims Administration System

## CLIENT:

Over fifty ISSI Health Funds.

## CONCERN:

Hundreds of Health & Welfare Funds required programming and process related enhancements to their claims administration computer systems after a major health insurance carrier decided to migrate from their old proprietary data file formats to the HIPAA EDI transaction sets.

## SOLUTION:

ISSI learns of the plan and contacts the insurance carrier directly to propose a controlled and streamlined solution for migrating affected clients to the new file formats, *at no additional cost to the Fund Offices.*

## OUTCOME:

ISSI collectively saves our clients hundreds of thousands of dollars by working directly with the insurance carrier and reduces/eliminates the fallout that the carriers' non-ISSI clients are experiencing.
